## FRONTEND & UI/UX DEVELOPER

Passionate Frontend and UI/UX developer with 1 year of professional experience in building responsive, user-centered web applications. Proven expertise in modern frontend technologies, interactive data visualizations, and delivering intuitive, seamless user experiences. Adept at performance optimization and implementing pixel-perfect designs.

## TECHNICAL SKILLS

- Frontend Technologies:** HTML, CSS, JavaScript, React.js, Angular, SCSS
- UI/UX Design:** AmCharts (v4 & v5), Kendo UI, Tailwind CSS, Interactive Data Visualization, Responsive Layout Design,
- Frameworks & Libraries :**Bootstrap, Material-UI, Tailwind CSS
- Responsive Design:** CSS Flexbox, CSS Grid, Media Queries
- API Integration & Tools:** RESTful API, Axios, Git, GitHub, VS Code
- State Management:** Redux, React Context API

## PROFESSIONAL EXPERIENCE

Frontend Developer  
Saffire Softtech

March 2024 - Present

- Developed interactive, user-friendly UI components using React.js & state management tools like Redux and Context API.
- Optimized web applications for performance and responsiveness using advanced CSS and JavaScript techniques.
- Implemented API integrations, ensuring seamless data flow and enhancing user experience.
- Designed and developed responsive layouts using CSS Grid and Flexbox for various devices.

UI/UX Developer  
Asset Analytix (Intern)

Dec 2023 - Feb 2024

- Assisted in planning and executing UI/UX designs for key projects, ensuring adherence to timelines and quality standards.
- Designed dynamic dashboards with interactive visualizations using AmCharts and Kendo UI.
- Styled and optimized applications for responsiveness using Tailwind CSS, Grid, and Flexbox.

### Projects

#### Ecommerce Portal

Role: Full-stack Frontend Developer

Technologies Used: React.js, Redux, Axios, CSS Modules, Node.js, MongoDB

Responsibilities:

- Designed and developed a scalable and intuitive "Add to Cart" feature with advanced UI elements, including dynamic product filtering, sorting, and category-based search.
- Implemented Redux for efficient state management, enabling seamless synchronization of product data across the app.
- Integrated RESTful APIs to fetch and manage product catalogs, handle cart updates, and process user transactions securely.
- Built a robust backend using Node.js and MongoDB to store and manage cart data, ensuring data integrity and smooth transactions.
- Conducted performance optimization, including lazy loading for images and code splitting, to improve application speed and reduce load times.

#### 360 Navigator

Responsibilities: I implemented Angular routing and modules for seamless navigation and parent-child component binding for efficient data interaction. Using Kendo UI and the Splitter, I designed flexible, user-friendly UIs and managed JSON data for dynamic content rendering. I also developed interactive dashboards with AmCharts 4 & 5 and styled the application using Tailwind CSS, Flexbox, and Grid for a modern, responsive design.

## EDUCATION

- Master of Computer Application**  
Sinhgad Institute of Management , 2021
- Bachelor of Computer Application**  
IPS Academy , 2017
- 12th(CBSE)**  
BPS School , 2014

## LANGUAGES

- English - Conversational
- Hindi - Native Proficiency
- Marathi - Conversational
